Professional Summary

A devoted full stack developer with a solid background in JavaScript, React, Tailwind CSS, Material-UI, and C# (.Net Framework). I am excellent at translating complex concepts into responsive, user-friendly interfaces with a strong eye for design and a passion for producing seamless user experiences. My expertise includes using contemporary web frameworks and technologies to create scalable, visually pleasing applications.

Experience

NUPAT Technologies

Frontend Development

- My primary duty as a frontend developer is to use HTML, CSS, JavaScript, and the React.js framework to design and manage user-friendly features and interfaces. This entails designing well-organized and websites that work seamlessly with a variety of devices. I create reusable components and effectively manage the state of the application by utilizing React.js.
- I work with teams such as other developers, designers, and project managers to produce solid frontend solutions that adhere to strict usability, accessibility, and performance standards while always keeping an eye on UI/UX concepts.
- Effectively using Git for version control to manage codebase changes and collaborate with other developers.

Imole Tech Hub

Web Development Instructor

- Creating course plans and instructional materials for teaching various aspects of web development, including HTML, CSS, JavaScript, and other relevant technologies
- Delivering lectures, leading discussions, and providing hands-on demonstrations to teach students the principles and techniques of web development
- Reviewing students' code submissions, providing constructive feedback, and guiding them towards writing efficient, clean, and maintainable code
- Mentoring students through individual and group projects, offering guidance on project planning, execution, and troubleshooting.

Projects

Scrutz | JavaScript, React, Tailwind CSS

- Developed Scrutz which is an innovative brand promotion application designed to put the power of marketing directly into the hands of users. With Scrutz, individuals and businesses alike can create, manage, and execute engaging promotional campaigns tailored to their unique brand identity.

DeBlaack Market | JavaScript, React, Tailwind CSS

- DeBlack Market is an online marketplace created to make it easier to acquire and sell used items at incredibly low costs. The platform, which serves a broad spectrum of vendors, enables sellers to easily register accounts and post their products for sale.

NUPAT Student's Dashboard | JavaScript, React, MUI, Tailwind CSS

- Developed NUPAT Student's Dashboard specifically for students and employees of NUPAT Technologies to collaborate, and share knowledge to facilitate better team collaboration and knowledge sharing across departments and projects.

Education

Federal University of Technology, Owerri Imo State

Jan 2014 - Dec 2019

Bachelor of Technology in Information Technology
